

Breakpoint

```
classDiagram
    class Breakpoint
    class AddressableWatcher["memoryoracle.watch.Addressable Watcher"] {
        + silent
        + name
        + __init__()
        + stop()
    }
    AddressableWatcher --|> Breakpoint
```

The diagram illustrates a class hierarchy. At the bottom is the 'memoryoracle.watch.Addressable Watcher' class, which is divided into three horizontal sections. The top section contains the class name. The middle section lists two attributes: '+ silent' and '+ name'. The bottom section lists two methods: '+ __init__()' and '+ stop()'. Above this class is the 'Breakpoint' class, represented by a box with three empty horizontal compartments. A blue arrow with an open triangular head points from the 'memoryoracle.watch.Addressable Watcher' class up to the 'Breakpoint' class, indicating that 'Breakpoint' inherits from 'memoryoracle.watch.Addressable Watcher'.

memoryoracle.watch.Addressable
Watcher

+ silent
+ name

+ __init__()
+ stop()
